Summary of Progress this Report
This period we focused on finishing up most of our APIs and getting things ready for the PRIM review. We also began work on authentication and authorization for the site. With the APIs, we worked on/finished the classes API, instructor API, and locations API. On the frontend, authentication is complete, but we are still working on authorization. Neither is implemented on the backend yet.

Pending Issues
None.

Plans for Upcoming Reporting Period
Finish up auth stuff. Wrap up the rest of the project, including tying the newly created APIs up with their corresponding frontend components.
